Economic Modelling

Index to Volume 1
January, April, July, October 1984

Articles – titles

Anatomy of a balance-of-payments crisis: application of a computable general equilibrium model to Turkey, 1978–1980. *J. D. Lewis* and *S. Urata*. 1.3, 281–303

Factor demand explanation in the COMET model. *G. d'Alcantara* and *A. P. Barten*. 1.2, 233–251

Freiburger and Tübinger quarterly econometric model for the Federal Republic of Germany: an overview. *D. Lüdeke, D. Friedrich, W. Hummel, W. von Natzmer, W. Röger, W. Röhling* and *J. Termin*. 1.2, 139–232

Ghana and the international cocoa market, 1956–1969: a simulation model. *P. R. D. Wilson*. 1.3, 327–344

Impacts of price variations on the balance of world trade. *A. Umnov*. 1.1, 63–90

The Liverpool macroeconomic model of the United Kingdom. *P. Minford, S. Marwaha, K. Matthews* and *A. Sprague*. 1.1, 24–62

The London Business School econometric model of the UK. *A. Budd, G. Dicks, S. Holly, G. Keating* and *W. Robinson*. 1.4, 355–420

Maximum-likelihood estimation of misspecified models. *G. C. Chow*. 1.2, 134–138

Model design and simulation. *R. Stone*. 1.1, 3–23

Preliminary results from a five-sector flow of funds model of the United Kingdom, 1972–77. *C. Green*. 1.3, 304–326

A price endogenous computable planning model for a dual economy. *H. R. Seddighi*. 1.4, 429–439

Random shocks in a simple growth model. *R. Stone*. 1.3, 277–280

The role of miniatures in computable general equilibrium modelling: experience from ORANI. *P. B. Dixon, B. R. Parmenter* and *A. A. Powell*. 1.4, 421–428

Some problems in modelling the optimal division of a 'cake' between an unknown number of participants. *J. S. Lane*. 1.1, 91–107

The Southampton Econometric Model. *D. F. Heathfield*. 1.1, 108–125

The Southampton Econometric Model Building Unit: some lessons learned. *D. Heathfield*. 1.3, 270–276

Unemployment or protectionism: some choices for the USA and Western Europe to the year 2000. *I. Sohn* and *N. Mandarino*. 1.2, 252–261
